

NEW! EJECT-O-MATIC

Reg. U. S. Pat. Off.

AUTOMATIC-FEED SOLDERING IRON

12

OUTSTANDING ADVANTAGES

1. Trigger Operated Automatic Feed—a touch of the trigger dispenses the solder!
2. Micrometer Control of Amount of Solder Ejected—from 1/16" to 3/8" lengths!
3. Anti-Fatigue Balance—Light Weight—can be used for hours without tiring the operator!
4. Retracting Feature—Automatic in action prevents melting of excess solder on tip!
5. Cooling Vanes—dissipate unused heat, keep iron at proper working temperature.
6. Non-Corrosive Tip—covered with a new, non-corroding alloy—needs no filing!
7. Safety Utility Base—provides resting place for iron, protects operator and bench from burns.
8. One-Hand Operation—leaves one hand always free to hold work!
9. Cool Handle—made of molded non-conducting bakelite.
10. Easy Loading—sliding cover provides quick access to loading chamber!
11. Easy to Clean—tip never needs filing. Wipe clean with flux paste.
12. Modern Design, Sturdy Construction—stainless steel used liberally throughout.

RETAILS AT \$18.95

PAT. APP. FOR

The first and only automatic-feed soldering iron. Houses the solder—measures the solder—ejects the solder—speeds-up the soldering!

Each Eject-O-Matic comes individually packed. Shipping wt. per carton of 12 units approx. 42 lbs.
